1.INTRODUCTION

1.1 Over view :-

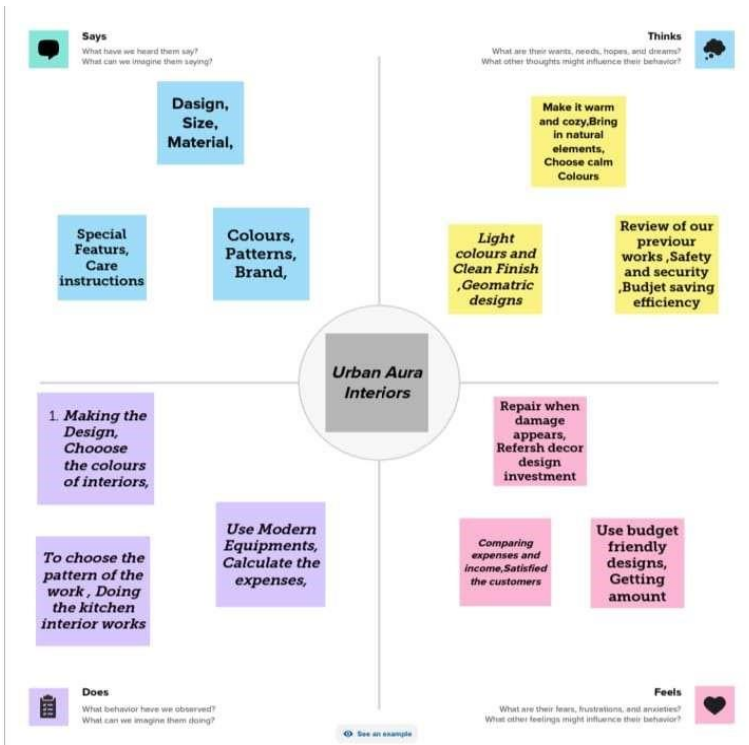

The urban interior style merges industrial with contemporary design, creating a modern, bohemian look. You'll see concrete floors, exposed timber beams, steel, and unfinished surfaces. Sophisticated finishes and high-end bespoke fixtures makes the Urban look more expensive and polished.

1.2 Purpose :-

Urban design can help in drawing up masterplans and design guidance for large areas, through to working up detailed designs for a local street or public space. It is about designing for people at the human scale, to make life better, and to make more attractive places that will remain valuable over time.

2. PROBLEM DEFINITION & DESIGN THINKING

2.1 Empathy Map:-

2.2 Idea on & Brainstroming

10. Which of the following is *not* a function of the skeletal system?

- Supporting the body
- Protecting internal organs
- Storing minerals
- Producing blood cells

- Use the *MyNotes* to your own brainstorming, working on your own or with a friend. Imagine and draw a display on your own. I provide an *idea* to the entire class.

- Before you reference**
a book or a chapter, find out the author, the title, the publisher, and the page(s).

3. **What are the steps in the process of the cell cycle?**
4. **What are the steps in the process of the cell cycle?**

- Define your problem statement**
- One pitfall for not trying to answer "How can we solve this problem?" is that the answer is "We can't do this. We're out of ideas." Before the answer is "We can't do this," you have to know the answer is "We can't do this."

- Example 15.10**
- One very common procedure for testing whether a sample is from the $N(\mu, \sigma^2)$ distribution is to calculate the sample mean \bar{y} and sample variance s^2 and then to calculate the test statistic
- $$T = \frac{\bar{y} - \mu_0}{s/\sqrt{n}}$$

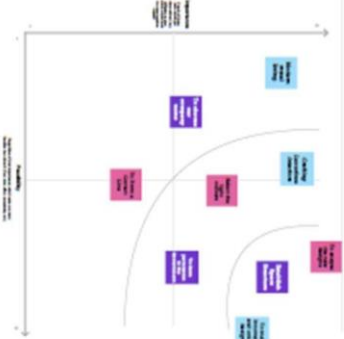

- [illegible]

- Pharmacokinetics**
 Your patient died at 1 hr of the wrong drug dose. A nurse who was nursing this patient 1 hour after the first dose of the drug was asked to draw a sample of blood for analysis.
